PROFILE SUMMARY

Full-stack JavaScript Developer with a strong proficiency in both front-end and back-end development. With a solid foundation in HTML, CSS, and JavaScript, I specialize in using popular frameworks such as Angular for front-end development. On the back end, I have expertise in Node.js and Express.js, along with experience in working with databases like MongoDB and MySQL.

PROFESSIONAL SKILL

Communication	Team Work
Problem Solving	Adaptability
Interpersonal	Critical Thinking

TECHNICAL SKILL

HTML and CSS	Git
Javascript	MongoDB
Angular	Express Js
MySQL	Node Js

EDUCATION

Bachelor in Software Engineering   2018 – 2022
  PUCIT New Campus, Lahore

Final Year Project
 A web portal using Node.js, Express, and PostgreSQL on the backend, and Angular on the frontend, to facilitate community support for those in need. The platform enables users to connect and offer assistance within their local area.

FSC – pre Engineering   2016 – 2018
  Punjab College, Lahore

Matric – Computer Science   2016
  Junior Officers High School

WORK EXPERIENCE

Software Engineer   March, 2023 – currently
Technosoft Solutions

  The projects I have worked on

- **Visitor Management:**
  Worked on the development of a visitor management app, utilizing Node.js, Express, MySQL, and Angular to streamline office visitor tracking and management

- **Interview Away:**
  Worked on the development of the interview away app, combining Node.js, Express, MySQL, and S3 storage, with Angular for the front end, and seamlessly integrating in-app purchases managed through Stripe. The app streamlines interview creation and response organization.

Associate Software Engineer   June, 2022 – February 2023
Txend

The projects I have worked on

- **POD Pay:**
  Worked as a front-end developer, I created the dashboard for Pod Pay, an app that simplifies pod management among cashiers, brokers, and contractors using Angular

Backend Developer Intern   June, 2021 – February 2022
Raheem Solutions

The projects I have worked on

- **Med Appointment:**
  Worked as a backend developer, I built a Node.js and Express.js application to handle appointment reservations, and patient and doctor profiles, and utilized Express.js APIs for seamless interaction with a MySQL database

- **Tree Records:**
  Worked as a backend developer, I built a Node.js and Express.js web application for managing football player profiles, with Express.js APIs facilitating data retrieval and storage in a MySQL database
